Supports Sensory Development

It is produced in accordance with the designs of Maria Tecla Montessori, Italian doctor of educational philosophy and scientific pedagogy and educator. We contribute to the physical, mental and emotional development of children by choosing materials made with natural materials that support child development in the design principle.

This toy helps children develop their creativity, problem solving skills and motor skills, while strengthening their bond with natural products. It can also be used as a yoga ring for adults. It is also used in physical therapy centers for stretching and muscle exercises.

Wooden Balance Walkway	DIMENSIONS	COLORS
	60 cm X 10 cm 6 pieces in a box	WOODEN

Improve Balance

A balance walkway develops motor skills and improves their ability to balance. It improves children's body control and coordination, which contributes to their overall physical development. Balance walkways increase their self-confidence and encourage courage and determination.

Balance walkways can increase children's interest in physical activity. By making movement fun, they encourage children to develop regular exercise habits. This contributes to their overall health and fitness.

Tiny Steps Big Improvement

It boosts their self-confidence
and encourages their courage
and determination.

Make Your Own Way

Push the limits of your imagination, exercise the way you want.

Improve Balance

Support muscle and balance development and lay the foundations for a healthy life.

Exercise

Start exercising and growing at an early age.

Activity Table for Kids

DIMENSIONS

80 cm X 51 cm X 52 cm

COLORS

WOODEN

Sensory Table

We may not want our children to grow up and become independent, but it is inevitable. What we can do is help our little ones by providing them with the tools they need to build their independence, confidence, and boundaries..

Foldable and Storable

This multi-purpose learning and activity table features a foldable and storable design, making it perfect for saving space at home. After use, it can be easily folded and tucked away in a cupboard, under a bed, or against a wall.

Activity Table Water and Soil

This specially designed activity table comes with two separate tubs, allowing children to play with both water and soil. It supports sensory development by encouraging hands-on exploration and interaction with nature. Water play offers a refreshing and fun experience, while soil play helps develop imagination and fine motor skills. Suitable for both indoor and outdoor use, it creates a fun and educational play space for children.

Wooden Clothing Rack with Shelves and Hangers

The Most Natural Wardrobe

Made of natural wood, this stylish and functional wardrobe allows you to store your clothes in an organized way and create a decorative look.

Thanks to its shelves, you can create extra storage space in your room by folding your clothes or displaying small items. The hangers are ideal for long clothes and jackets.

Worthy of Your Clothes

It helps your child develop motor skills, gain a sense of balance and promote independence.

Montessori Designs

Designed in accordance with Montessori educational philosophy. It supports children's imagination and creativity and offers a safe playground.

Developmental Support

It helps your child develop motor skills, gain a sense of balance and promote independence.

Natural

Made of durable wooden material without harmful chemicals, it is the ideal solution for keeping your baby's clothes organized.

Snake Path Ball Balance Board

DIMENSIONS

102 cm X 58 cm X 7 cm

COLORS

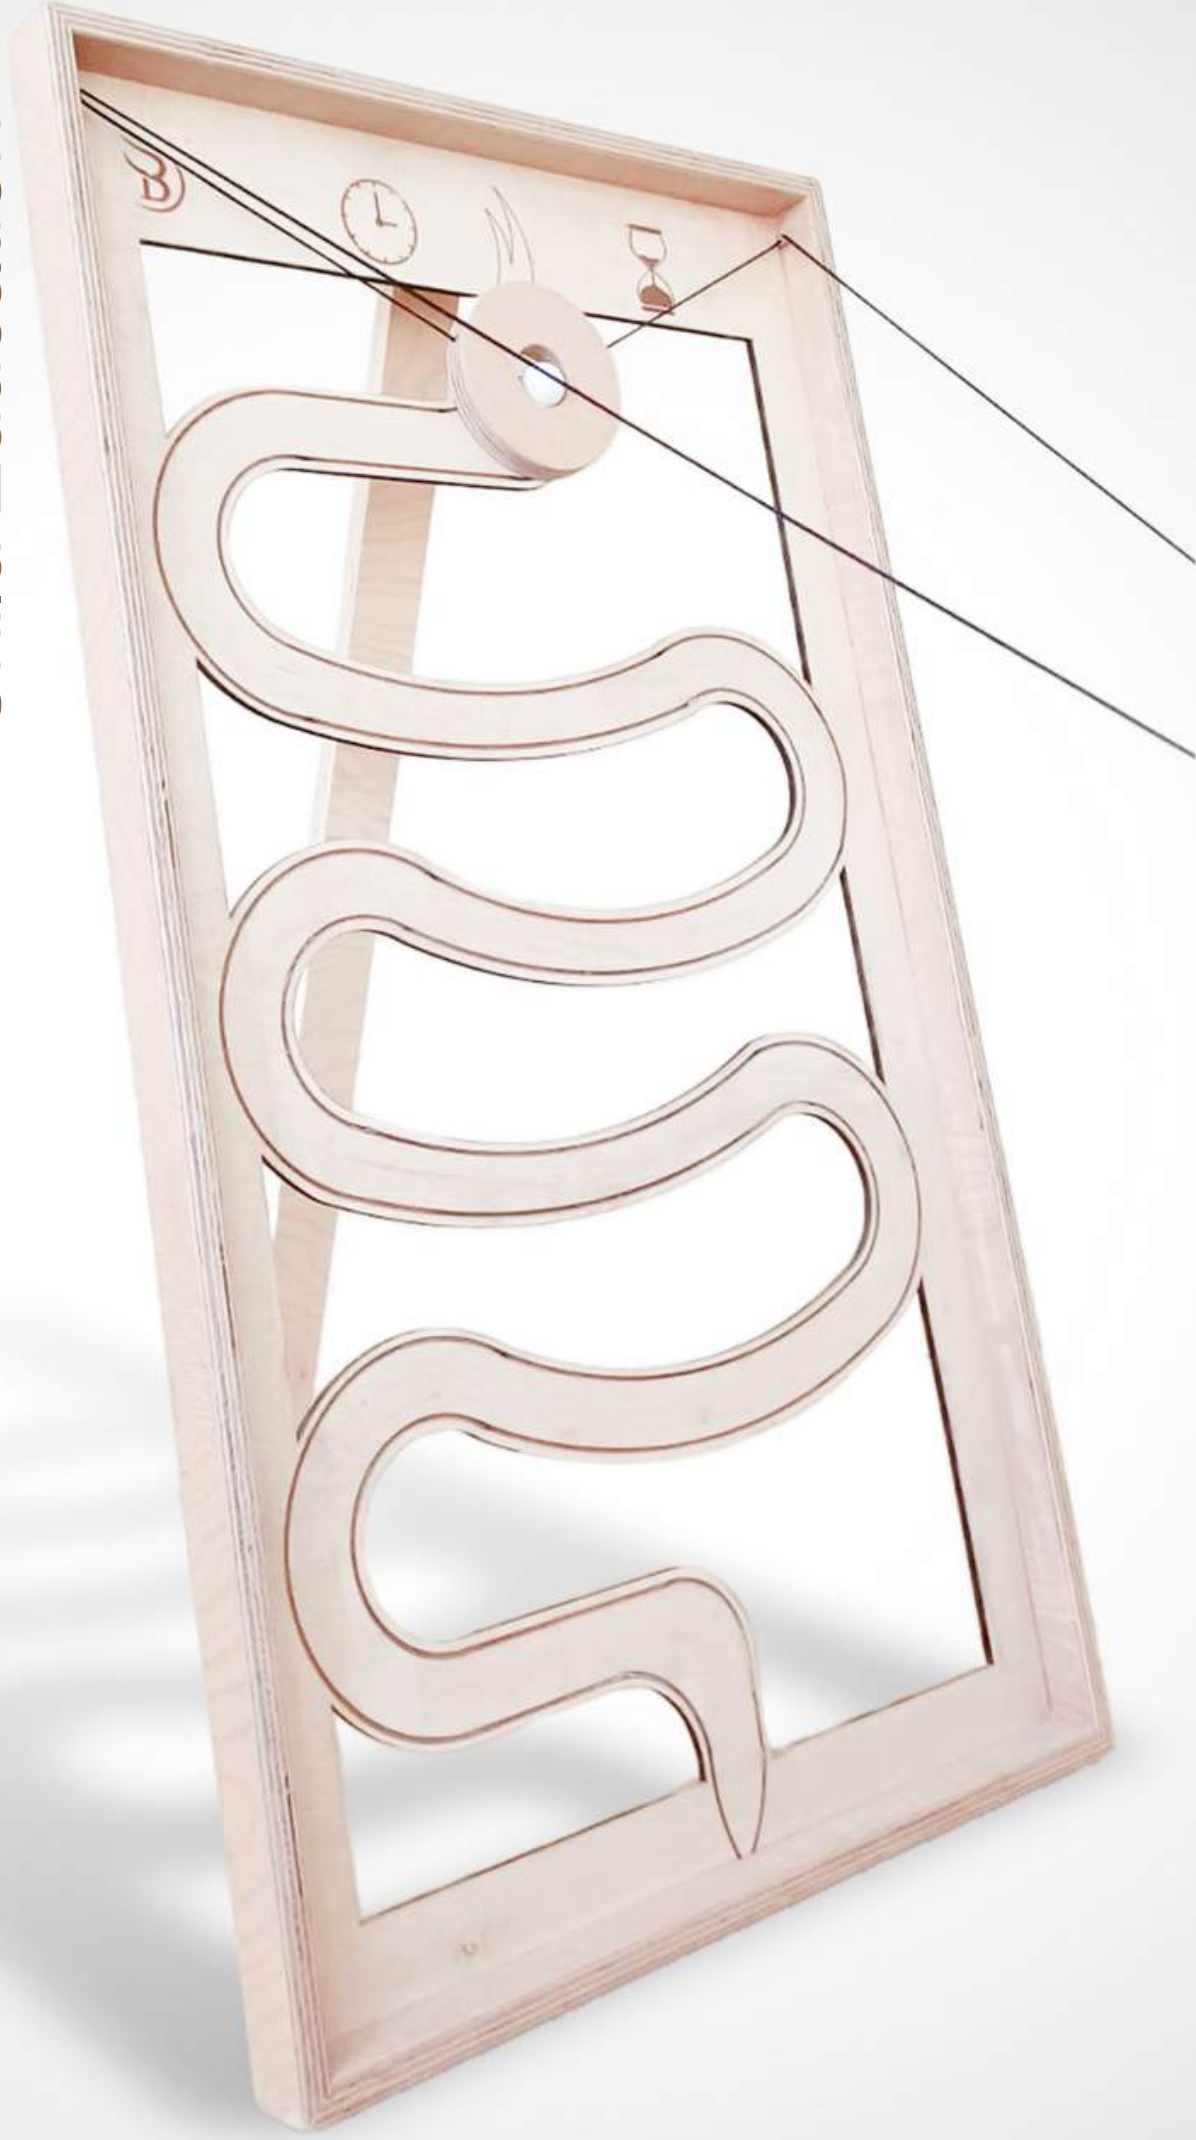

WOODEN

Improving hand-eye coordination

Wooden Snake Path Ball Balance Game helps children improve their attention and concentration, strengthen their hand-eye coordination and fine motor skills.

The game increases children's patience and endurance, while supporting their strategic thinking and problem solving skills. With its fun and educational nature, it improves children's focusing skills and encourages them to focus more comfortably on the task in front of them.

A wooden mechanical model of a snake, featuring a winding path and a small clock mechanism. The model is constructed from light-colored wood and is mounted on a rectangular frame. A thin black string is attached to a small circular component at the top, which is connected to a small clock face. The string then winds through a series of loops and turns, mimicking the movement of a snake. The clock face has a single hand and a small figure. The entire model is set against a plain white background.

Wooden Upholstered Swing with Rope
